

Measurement & Sizing Guide

How to find your sizes

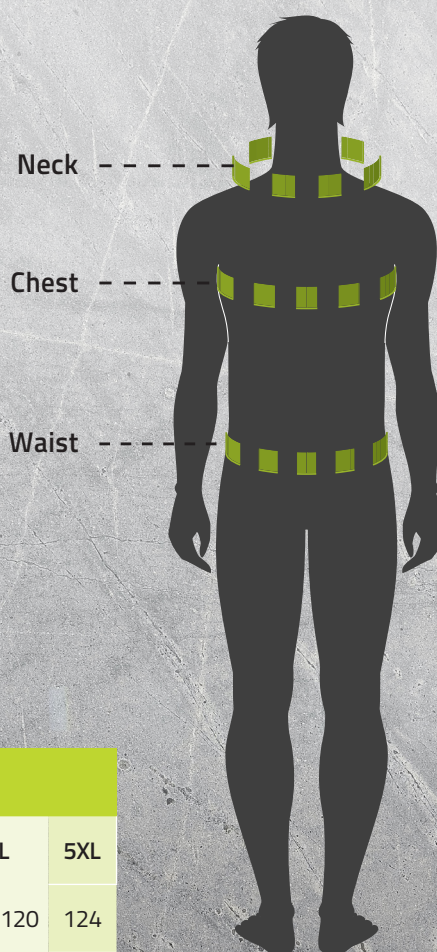

Please check your measurements against the charts below to confirm your size.

Measure over light clothing or underwear.
For accuracy please ask someone else to measure you.

Neck - Measure around the neck without pulling too tight.

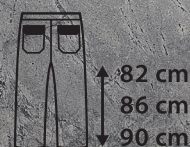

Chest - Standing normally measure the fullest part under the arms. Convert to small, Medium, Large etc. according to the chart below.

Waist - Measure the waist where the trouser waistband normally sits. For inside leg, when standing normally ask someone to measure your trousers from crotch seam to hem.
